

# NATIONAL BIBLE BOWL QUIZBOX SYSTEM

This quiz system will indicate the first quizzer to respond by turning on their light, locking everybody else out, and sounding a tone. Their response also starts a built-in timer, counting down the 3 seconds to speak.

While the picture shows 2 teams of 4, the control box can handle up to 3 teams, each with many contestants, so you can have large practices or quizzes if extra quizzer stations are purchased.

The quizzer stations have a built-in switch and 4 LEDs aimed to shine out the front, so the audience gets a clear indication of who responded first.

Each team gets a breakout cable that up to 5 quizzer stations can plug into. To expand the team more than 5 quizzers, you will need more breakout cables or individual splitter (“Y”) cables.

Warranty: 2 years on the Control box and quizzer stations, except for abuse or user modifications. 90 days on the AC adapter and cables. (No workmanship is involved on my part, and I can’t control how you treat them.) Shipping will be charged for repairs done under warranty.
