

# USB QUIZBOXES

**3 TEAMS OF 5 WITHOUT LIGHTS  
REQUIRES A PC**

**3 TEAMS OF 5 WITH LIGHTS  
USE WITH OR WITHOUT A PC**

The quizboxes determine who responded first out of 15 quizzers, lock everyone else out, and sound a tone. The box with lights shows who was first, and can be used without a PC as a basic quizbox, which can be quite handy for quick practices. A power supply is provided for this purpose. Since the quizbox without lights cannot show who was first, it always requires a PC.

When connected to a PC, it adds the features shown in the screen shot above: Quizzer display, Team names, Team scores, the Question number, and the Timer. The quizbox is powered by the PC in this mode. If your PC has the capability to run a second monitor, the display can be projected to a large screen. Note: special instructions are required for loading the program on Windows 8 or 10.

The quizboxes are made to work with seatpads, and use the standard round 8-pin plug. Unused seats can be turned off via the PC or by the Quizzer Detect switch when not connected to a PC. The quizboxes can also be adapted to work with handpads (slap switches) and pendant (handheld) switches.

Warranty: 2 years on the quizbox, except for abuse or user modification; 1 year on the seatpads.

<b>Price List</b>	7/1/2017*
