

USB QUIZBOX

**2 TEAMS OF 4 WITH LIGHTS
USE WITH OR WITHOUT A PC**

The quizbox shows who responded first out of 8 quizzers, locks everyone else out, and sounds a tone. There are lights on both sides of the quizbox, so the quizzers, as well as the quizmaster, can see who responded first. If used without a PC, it works just fine as a basic quizbox, and can be quite handy for quick practices. An AC adapter is provided for this purpose. When used without a PC, a 32 second timer automatically starts when someone responds, allowing 2 seconds to recognize the quizzers and 30 seconds to complete the answer.

When connected to a PC, it adds the features shown in the screen shot above: Quizzer display, Team names, Team scores, the Question number, and the Timer. The quizbox is powered by the PC in this mode. If your PC has the capability to run a second monitor, the display can be projected to a large screen. Note: special instructions are required for loading the program on Windows 8.

The quizbox will work with handpads (slap switches) or pendant (handheld) switches.

Warranty: 2 years on the quizbox and quizzer switches, except for abuse or user modification; 90 days on the adapter and cables. No workmanship is involved on my part, and I can't control how you treat them.

Price List	7/1/17*
Whole system - quizbox, software, 8 switches, cables, adapter, shipping.	\$325.00
Optional Briefcase carrying case	\$37.00
